

## Helping your child with Geography

Geography is a journey of investigation and exploration.

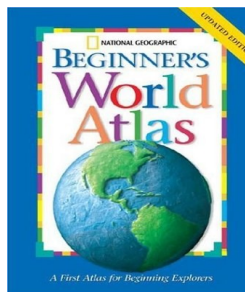

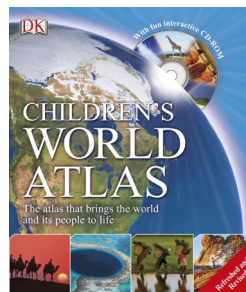

## Geography

Our curriculum is taught through a cross curricular topic approach, giving more value, depth and understanding to locations, cultures, and traditions.

We have access to globes, aerial photographs, maps and atlases. We create our own maps using keys and birds eye views.

We will often have themed days and weeks, or an extra special visitors to enrich our learning by bringing it to life.

## Ways to help your child

- Investigate street signs and road names. What is your address?
- Look at maps and leaflets for your days out. Where did you start and where did you finish?
- Where is your family from? Can you locate them on a map or Globe?
- Where have you been, or are you going on holiday? How will you travel there? Borrow a holiday brochure and become a travel agent!
- Where do you live? Can you make a map of your journey to school? Add any landmarks (e.g. postboxes, shops, parks)
